

Yogesh Vishvakarma

FULL STACK DEVELOPER (LARAVEL & PHP SPECIALIST)

Results-driven Full Stack Developer with 4.5+ years of professional experience specializing in building, deploying, and maintaining high-performance web applications using the Laravel and PHP ecosystems. Proficient in database schema design, PostgreSQL & MySQL optimization, secure API development, and automated background processing. Demonstrated expertise in setting up robust server deployments (Nginx, VPS, PM2) and implementing complex authentication systems (RBAC, Multi-Auth, OAuth, JWT). Passionate about writing clean, modular, and maintainable code to solve complex business problems.

TECHNICAL EXPERTISE

BACKEND & CORE ARCHITECTURE

- PHP (Core & OOP)
- Laravel Framework
- Codelgniter
- RESTful API Design
- Laravel Horizon & Queue Jobs
- MVC Architecture
- Composer Packages
- Cron Jobs & Task Scheduling
- JWT Token Auth
- Laravel Sanctum & Passport

DATABASES & QUERY TUNING

- MySQL Database
- PostgreSQL
- Relational DB Design
- Query Optimization & Indexing
- Eloquent ORM & Query Builder

DEVOPS & SERVER DEPLOYMENT

- AWS EC2 & S3 Buckets
- Linux Terminal & Shell Scripting
- Nginx Web Server
- Apache Configuration
- PM2 Process Manager
- SSL Installation (Let's Encrypt)
- cPanel & WHM Management
- VPS Server Setup

FRONTEND & UI INTEGRATION

- React.js
- Vue.js
- HTML5
- CSS3 & SASS
- JavaScript (ES6+)
- Bootstrap Framework
- jQuery & AJAX

EMPLOYMENT HISTORY

Full Stack Developer

Dec 2021 — Present

AyanshTech Solutions, Noida, India

- Designed, developed, and maintained full-scale web portals, ERP platforms, and customer dashboards using Laravel, PHP, React.js, and PostgreSQL/MySQL.
- Created secure and efficient REST APIs for mobile applications and external systems, documenting endpoints using Postman.
- Wrote custom database migration scripts, designed relational schemas, and resolved database bottlenecks using indexes and optimized query layouts.
- Implemented advanced authentication and security practices, including role-based access control, multiple user guard sessions (Multi-Auth), and Google OAuth.
- Set up production environments on AWS EC2 and DigitalOcean VPS, deploying applications using Nginx, PM2, and SSL configurations.
- Collaborated closely with cross-functional teams to integrate payment processors (Razorpay, Stripe) and communication channels (WhatsApp Cloud API, SendGrid SMTP).

FEATURED PROJECTS PORTFOLIO

Usaev.io — Social Media Automation Platform

LARAVEL · VUE.JS · LARAVEL HORIZON · OPENAI API

Designed and built an automation platform allowing users to write, schedule, and automatically publish posts to 8 major channels. Utilized OpenAI API to auto-generate post copywriting copies.

- **Automated Post Scheduling:** Enables users to set a future time; the system automatically triggers post publishing.
- **API Integrations:** Facebook API, Instagram API, X (Twitter) API, LinkedIn API, YouTube API, Pinterest API, TikTok API.
- **Job Processing:** Implemented Laravel Horizon with Redis queue workers to run API postings asynchronously in the background.

Averti Systems — Enterprise Operations ERP Portal

LARAVEL · POSTGRESQL · REST APIS

Engineered a complete enterprise ERP resource planner to manage business workflows and workforce tracking.

- **Core Business Modules:** Built integrated POS (Point of Sale), Accounting System, Sales Management, and Purchase Module.
- **HRMS & CRM:** Developed HR Management System (HRMS) for payroll and employee database, Task Management System, and Customer CRM.
- **Real-time Chatting:** Built a messaging channel for internal communication.

CCare ABG — Clinical Diagnostic Medical System

LARAVEL · MYSQL · DOMPDF

Created a clinical ABG (Arterial Blood Gas) processing platform for hospital laboratory reporting.

- **Multi-Role Access Control:** Designed distinct permission profiles for Admin, Hospital, Doctor, and Patient views.
- **Report Generation:** Hospitals/Doctors log in, enter blood gas metrics, and the system automatically calculates parameters.
- **PDF Export:** Generates formatted lab reports available for direct download as PDF or printing.

GR Logistic — Supply Chain & Logistics Dashboard

LARAVEL · WHATSAPP API · EMAIL API

Developed a container tracking system monitoring goods dispatched globally (e.g., India to China and vice-versa).

- **Warehouse Registering:** Purchases sent to the warehouse are registered and tracked inside the dashboard.
- **Automated Alerts:** When a container/vessel is loaded, the system automatically triggers alerts via WhatsApp API and Email.
- **Delivery Tracking:** Dispatches final notifications to the buyer once the ship reaches the destination port.

Women To Women (W2W) TV — Subscription OTT Network

LARAVEL · REACT.JS · POSTGRESQL · S3 · GOOGLE FIREBASE

Managed database configurations, Amazon S3 media buckets, and the reporting & analytics panel.

→ **Playback Tracking:** Integrated Google Firebase to capture viewing duration, device metadata, and browser profiles.

→ **Location Demographics:** Created analytical graphs plotting video play counts across different countries.

ACADEMIC QUALIFICATIONS

Master of Computer Applications (MCA) Kamla Nehru Institute of Technology (KNIT) Sultanpur, Uttar Pradesh · 2018 — 2021	Bachelor of Computer Applications (BCA) ICSM College Varanasi, Uttar Pradesh · 2014 — 2016
--	---

PERSONAL DETAILS & ATTRIBUTES

Date of Birth: 11th September, 1997	Languages Known: English, Hindi
Key Strengths: Analytical Thinking, Problem Solving, Quick Learner	Interests: Exploring New APIs, Open Source Contributions

DECLARATION

I hereby declare that all the information provided above is true and correct to the best of my knowledge and belief.

Date: 24th July, 2026

Place: Noida, India
